## DETAILED ACTION

### *Response to Amendment*

1. Applicant's amendment filed June 11, 2008, has been entered. Claims 14, 15, and 22 have been amended as requested. Claims 1-13, 16-21, and 23-25 have been cancelled. Thus, the pending claims are 14, 15, and 22.
2. Said amendment is sufficient to overcome the 112, 2<sup>nd</sup> rejection set forth in sections 4-6 of the last Office Action (Non-Final Rejection mailed 10/30/07).
3. Additionally, said amendment is sufficient to withdraw the prior art rejections based upon the cited Burns reference (US 4,590,766). Specifically, as pointed out by applicant in said Amendment, Remarks section, page 6, line 24-page 7, line 13, Burns heat-treats the fabric to simultaneously fix the dye and to active the etching composition, while applicant's present claims require separate steps of dye fixation and etching. Notably, as discussed by applicant, the present invention includes a drying step which *partially dries the fabric having unfixed dye thereon without fixing a substantial portion thereof*. The invention includes a *subsequent step* of etching the fabric and *then heating said etched fabric* to fix said dye. Burns fails to teach or suggest these combination of process steps, which applicant asserts provides the claimed color shading contrast (i.e.,  $\Delta L^*$  values). Therefore, the presently claimed method of making a fabric are patentably distinct from the Burns invention.
4. For the record, it is noted that applicant's other arguments are not found persuasive and are not necessarily the basis for indication of allowable subject matter. Specifically, applicant argues the claimed fabric is drawn to polyester, while Burns only

Art Unit: 1794

exemplifies acrylic fabrics (Amendment, page 6, 3<sup>rd</sup> paragraph and page 7, 3<sup>rd</sup> paragraph). This argument is unpersuasive since Burns clearly teaches other suitable fabrics include those of polyester fiber (col. 2, lines 12-20). Note the Burns disclosure is not limited to its working embodiments. Disclosed examples and preferred embodiments do not constitute a teaching away from a broader disclosure or nonpreferred embodiments. *In re Susi*, 440 F.2d 442, 169 USPQ 423 (CCPA 1971).

5. Additionally, with respect to the presently claimed alkaline etching composition (Amendment, page 6, 3<sup>rd</sup> paragraph), it is asserted that said alkaline compositions are well-known in the art and would have been obvious over the Burns teachings.

6. Furthermore, applicant's statement, "Instead, Burns teaches applying dyes and sculpting compositions from guns bars, applied simultaneously" (Amendment, page 6, 4<sup>th</sup> paragraph), is not a complete representation of the Burns disclosure. In particular, said simultaneous application is a preferred embodiment of a broader disclosure. Note Burns states, "the sculpturing composition may be applied to the fabric substrate before, during, or even after application of, but prior to heat setting, the various dyes to the fabric which may be applied in a pattern (col. 4, lines 53-57). Hence, while Burns does limit the fixation of dye and activation of sculpting composition to a simultaneous heating step, the Burns invention is not necessarily limited to simultaneous application of dye and sculpting composition.

#### ***Allowable Subject Matter***

7. An updated search of the prior art has produce no new art for which to base a rejection upon. Therefore, claims 14, 15, and 22 are allowed.

Art Unit: 1794

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

9. The art made of record and not relied upon is considered pertinent to applicant's disclosure.
